Claudi Santiago is a Senior Vice President of GE and the President and CEO of GE Oil & Gas. Appointed to his current role in 1999, he has led the business through a period of significant growth and has overseen the transformation of a traditional manufacturing company into a world-class business partner to many of the world's leading oil and gas industry players.

Mr. Santiago joined GE in 1980 as a Project Manager with GE Information Services. Over the following years he held positions of increasing responsibility across Europe until 1991 when he moved to Rockville, Maryland, USA as Worldwide Marketing Leader for GE Information Services.

After a move to lead GE Information Services in Europe based in Paris (France) in 1997, Mr. Santiago joined the newly acquired Nuovo Pignone business to establish an Aftermarket Services unit. Today this part of the company contributes a significant proportion of GE Oil & Gas' revenue from the comprehensive range of equipment services including field based technical assistance, product upgrades and customized service agreements.

In 2006, Mr. Santiago received the GE Chairman Leadership Award for being an exceptional builder and key driving force of the growth and transformation of the Oil & Gas business.

Mr. Santiago holds a master degree in Computer Science from the Universidad Autonoma of Barcelona and has completed postgraduate studies at INSEAD in Fontainebleau (France) and Georgetown University in Washington, D.C. (USA).

A native of Barcelona (Spain), Claudi Santiago is fluent in Spanish, English, French, and Italian. In his free time he enjoys playing tennis and feeding his love for art. He and his wife Nuria have two children.

About GE's Oil & Gas business:

GE Oil & Gas (www.ge.com/oilandgas) is a world leader in advanced technology equipment and services for all segments of the oil and gas industry, offering complete solutions for production, LNG, transportation, storage, refineries, and petrochemicals. It also provides pipeline integrity solutions including software and asset management. With its acquisition of VetcoGray and Hydril Pressure Control, GE Oil & Gas now offers additional products, systems and services for drilling, completion and production within onshore, offshore and subsea applications.

With more than 12,000 employees and \$7.7Bn of orders, the business is a significant unit in GE Energy Infrastructure, one of the four core segments of GE.
