

# Nexen Buzzard Project

The Buzzard Development is one of the largest oilfields to be discovered and developed in the UK North Sea for more than a decade. Operated by Nexen, this large development lies 60 miles off the coast of Scotland where three platforms, linked by bridges will recover estimated reserves of around 550 million barrels oil equivalent.

VetcoGray was awarded the contract in March 2004

## Project Scope

- 5 base case 5" x 2" 10,000 psi rated horizontal xmas trees, chokes and subsea control modules
- 4 TWI xmas trees with 3-1/16" annulus water injection valves, WI chokes, subsea control modules and 10 subsea wellheads
