

Smallworld Office* Suite Guided Tour and Fit Analysis Program

fact sheet

Utilities have realized that highly customized solutions are very expensive to administer and maintain. Lowering the cost of ownership for IT systems, including geospatial asset management applications, is an objective for most utilities. The Smallworld Office* Suite applications provide the perfect solution to meet these goals for the pipeline, gas, and electric markets.

- Would you like help in understanding the capabilities and potential savings of moving toward standard, supported industry-specific applications?
- Would you like to identify and quantify reductions in total cost of ownership?
- Would you like help understanding the benefits that industry standard applications provide?
- Would you like to lay out a plan for straightforward and seamless upgrades as Smallworld* applications evolve?
- Would you like to map a least-cost path to move your organization to the Smallworld Office* Suite products?

GE Energy has a service solution to meet your needs... Smallworld Office Suite Guided Tour and Fit Analysis Program.*

The Smallworld Office* Suite Guided Tour and Fit Analysis Program consists of a framework that facilitates an analysis of your current environment, including hardware, software, data model and applications, followed by a guided tour of your targeted Smallworld Office* Suite application(s). Analysis will focus on

- Industry Data Model
- Data Maintenance and Integrity Applications
- Data Output and Reporting Applications
- Business Process Integration
- Enterprise Application Integration

Together with the IT and business stakeholders of your company, our customer service team facilitates an understanding of the current geospatial asset management environment. We perform on-site workshops, a guided tour of the Smallworld Office* Suite product(s) and analyze their fit and benefits for your organization. We then develop the transformation roadmap to migrate your organization to the Smallworld Office* Suite product(s). Support continues through co-development of a business case and executive briefing to outline the justification, benefits, and reduction in cost that Smallworld Office* Suite offers.
