

Smallworld* Office Suite Quick Start Program

fact sheet

- Would you like to leverage a structured proven approach to training staff, gathering requirements, and starting the Smallworld* Office Suite implementation?
- Would you be interested in a low cost, low risk program that will identify short-term goals to offer your organization clearly defined business benefits and operational improvements?

GE Energy has a service solution to meet your needs . . .

Smallworld Office Suite Quick Start Program

The Smallworld Office Suite Quick Start Program consists of a framework that includes a series of training classes, installation support, workshops, and on-site support to help build and define the implementation plan for these applications. The program introduces the Smallworld Office Suite product into your organization and helps you to determine the scope and requirements of your initial implementation so that you can quickly begin achieving a return on your technology investment.

Support of product installation

Client staff training

On-site workshops

On-site support, mentoring

The program includes the following services:

- Business process mapping
- Data model specification
- Configuration and interface requirements (if applicable)
- Custom requirements (if applicable)

GE Energy provides experienced staff and valuable course and workshop material throughout the delivery of the program.

Roles, responsibilities, and objectives are clearly stated.

As a result, GE Energy is able to provide this program at a low risk and low cost to you.
