

Enhancing the Customer's Optimization and Control Experience

GE Energy's Customer Application Center in Florence, one of two CACs in Europe, provides customers with an up-close look at advanced technology Optimization and Control products and services—including the latest developments in machinery diagnostics, reliability, controls, plant asset management, and System 1® solutions.

As part of the GE Oil and Gas Florence Learning Center—the largest training center in Europe—the CAC utilizes the services of a 5600 square meters facility with 30 fully equipped rooms for customer-tailored activities. This world-class learning center also provides conference services, offering a convenient location with state-of-the-art technical resources and highly trained GE specialists.

Meeting Customer Expectations

Along with comprehensive product demonstration, the Florence CAC can provide you with educational programs, conferences, custom product-training, and hands-on operation of advanced asset-management equipment and plant control system software—helping you to select the optimum solution for your plant needs.

Features

GE's CAC specialists provide expert support that enables you to select the optimum solution for your plant. Features include:

- **Product demonstration center.** Hands-on experience to get the touch and feel of the latest Optimization and Control technology.
- **World-class training center.** Provides customers with educational programs, conferences, custom product training.

- **Industry and application-specific workshops.** Professionals from various segments can meet, learn, and share Best Practices from around the globe.
- **Decision-making support.** Resident CAC experts support your decision-making process for improving productivity and reliability at your facility.
- **Extended visit opportunity.** Attendees at Learning Center conferences can extend their stay and have GE's CAC experts assist you with your plant optimization and control needs.

Benefits

- Hands-on experience with advanced technology
