Optimization and Control

Technology Day – Bergen 6th May 2009

Location; GE Energy Laksevåg - Bergen

Bently Nevada™
Asset Condition Monitoring

This seminar will be conducted with Norwegian speakers only!

Main topics will be

- Maintenance Strategies
- Condition Monitoring solutions for critical and essential machinery
- Diagnostics for Sleeve and Roller Element Bearings
- Demonstration of Condition Monitoring systems, System1, Wireless and more

The seminar is applicable for personnel either working with maintenance on a day-to-day basis or responsible for maintenance strategies.

The seminar is at no cost for the attendances.
